

aerodyne 38 Regatta Sport

A highly respected name in the USA, Aerodyne Yachts is destined to become the premier performance sailing yacht marque in Europe.

Designed by top offshore speed specialists Rodger Martin and Groupe Finot, Aerodyne yachts are now built in Finland to aerospace standards and to the high quality and fitout expected of the legendary Finnish yacht building industry.

At Aerodyne, 'high tech' means just that. We use heat-cured epoxy/e-glass/carbon composites to ensure our yachts are incredibly quick. Awesome responsiveness and low weight make for easy handling by a shorthanded crew.

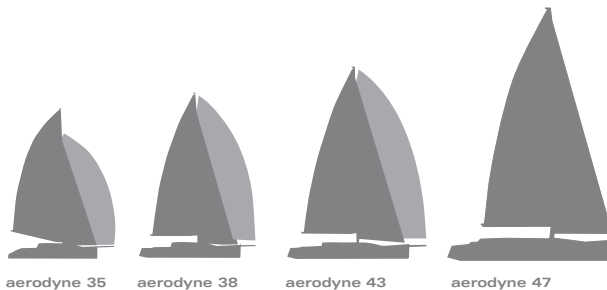

Choose from the race winning Regatta Sport versions and the luxurious Gran Touring models which combine effortless sailing with fast cruising and a lightweight luxury interior.

It even sounds faster than the competition.
